Please work out the math story problems.

I see 10 dogs sit in front of the fire. Two dogs walk away because they get too hot. How many dogs are still in front of the fire? Please show how you know by drawing a picture and writing a number sentence to prove it.

$$10-2=8$$

Adam reads 5 pages altogether.

I see 10 cats sit in front of the fire. Three cats walk away because they get too hot. How many cats are still in front of the fire? Please show how you know by drawing a picture and writing a number sentence to prove it.

I see 10 snowmen out side in the yard. When I wake up the next day, the sun comes out and 5 of the snowmen melt. How many snowmen are still in the yard? Please show how you know by drawing a picture and writing a number sentence to prove it.
